InSphero and Cell Culture Service enter partnership

May 03, 2011. The biotechnology companies InSphero AG (Zurich, Switzerland) and Cell Culture Service GmbH (Hamburg, Germany) signed a commercial cooperation agreement today. The partnership fosters the implementation of 3D cell-culture technologies in pharmaceutical development and both companies will join forces in customer projects to deliver next-generation, organotypic cell-based models for compound de-risking.

InSphero (www.insphero.com) is the leading supplier of assay-ready scaffold-free 3D microtissues and 3D cell cultures for in-vitro assessment of compound efficacy and toxicity. Cell Culture Service (www.cellcultureservice.com) is a custom supplier of recombinant cell lines, frozen cells, membranes and proteins with an excellent track record over more than 10 years in the market.
